

June 2021 Newsletter

SBA Students showcase their entrepreneurial missions with Chambers of Commerce

Between the 7th - 9th June 2021 School Business Alliance conducted its final mobility. This was perhaps the most important event in the project. Students, Teachers, Chambers of Commerce and partners of the project met together online to create and develop the project outputs that will offer the best practice guidance to schools and chambers in Europe.

The mobility was able to evaluate what has been learnt from the student missions by creating new media content. It allowed everyone to develop a common

understanding of how to work together to launch successful entrepreneurial ventures.

At the outset of the mobility students from Turkey, Slovenia, Northern Macedonia and Bulgaria delivered presentations about their journeys through the entrepreneurial missions and what they have learnt through the project. One of the most valuable contributions to the mobility was the ability for students, teachers and chambers from different countries to learn about each other's experiences. One way in which this was conducted was through watching and comparing their different entrepreneurial journeys.

These videos celebrate success of their innovation and the entrepreneurial mindsets of the students in these different countries.

The role of chambers of commerce has been incredible in guiding the learning journey of students help them learn business skills and open-up opportunities that did not exist before. The participating schools have highlighted how unique these immersing opportunities were, even under the conditions of the current pandemic.

These challenges brought the best out of the students, improved their communication abilities and encouraged the new entrepreneurial developments they showcased during the mobility were brilliant.

We are approaching the final stages of the [SBA project](#) and are proud to say that the Guide for Chambers of Commerce and the Learning Materials for Schools are being prepared as the flagship outcomes of the project. From the exciting footage produced from the Mobility we look forward to showing you the video journeys of the students' missions and their work with Chambers of Commerce. Watch this space!
